

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-23 (Cancelled).

Claim 24 (Currently Amended): A material for an organic electroluminescence device represented by following general formula (4):

General formula (4)

wherein X^1 and X^4 each independently represent a substituted or unsubstituted arylene group having 6 to 30 carbon atoms, X^1 and X^2 may be bonded to each other, X^3 and X^4 may be bonded to each other, Y^1 to Y^4 each independently represent an organic group represented by general formula (2), a to d each represent an integer of 0 to 2 with the proviso that $a + b + c + d \geq 0$; general formula (2) being:

General formula (2)

wherein R^1 to R^4 are each independently a hydrogen atom, a substituted or unsubstituted alkyl group having 1 to 20 carbon atoms, a substituted or unsubstituted aryl group having 6 to 20 carbon atoms, cyano group or form a triple bond by a linkage of R^1 and R^2 or R^3 and R^4 , Z represents a substituted or unsubstituted aryl group having 6 to 20 carbon atoms and n represents 0 or 1.

Claim 25 (Currently Amended): A dopant material for an organic electroluminescence device represented by following general formula (4):

General formula (4)

wherein X^1 and X^4 each independently represent a substituted or unsubstituted arylene group having 6 to 30 carbon atoms, X^1 and X^2 may be bonded to each other, X^3 and X^4 may be bonded to each other, Y^1 to Y^4 each independently represent an organic group represented by general formula (2), a to d each represent an integer of 0 to 2 with the proviso that $a + b + c + d \geq 0$; general formula (2) being:

General formula (2)

wherein R¹ to R⁴ are each independently a hydrogen atom, a substituted or unsubstituted alkyl group having 1 to 20 carbon atoms, a substituted or unsubstituted aryl group having 6 to 20 carbon atoms, cyano group or form a triple bond by a linkage of R¹ and R² or R³ and R⁴, Z represents a substituted or unsubstituted aryl group having 6 to 20 carbon atoms and n represents 0 or 1.

Claim 26 (Currently Amended): A hole transporting material for an organic electroluminescence device represented by following general formula (4):

General formula (4)

wherein X¹ and X⁴ each independently represent a substituted or unsubstituted arylene group having 6 to 30 carbon atoms, X¹ and X² may be bonded to each other, X³ and X⁴ may be bonded to each other, Y¹ to Y⁴ each independently represent an organic group represented by general formula (2), a to d each represent an integer of 0 to 2 with the proviso that a + b + c + d ≥ 0; general formula (2) being:

General formula (2)

wherein R¹ to R⁴ are each independently a hydrogen atom, a substituted or unsubstituted alkyl group having 1 to 20 carbon atoms, a substituted or unsubstituted aryl group having 6 to 20 carbon atoms, cyano group or form a triple bond by a linkage of R¹ and R² or R³ and R⁴, Z represents a substituted or unsubstituted aryl group having 6 to 20 carbon atoms and n represents 0 or 1.

Claim 27 (Previously Presented): The material for an organic electroluminescence device according to Claim 24, wherein in formula (4) a + b + c + c = 0.

Claim 28 (Previously Presented): The dopant material for an electroluminescence device according to Claim 25, wherein in formula (4) a + b + c + d = 0.

Claim 29 (Previously Presented): The hole transporting material for an electroluminescence device according to Claim 26, wherein in formula (4) a + b + c + d = 0.

Claim 30 (New): The material for a blue-light emitting organic electroluminescent device comprising the material of Claim 24.

Claim 31 (New): The dopant material for a blue-light emitting organic electroluminescent device comprising the material of Claim 25.

Application No. 10/814,121
Reply to Office Action of July 29, 2004

Claim 32 (New): The hole transporting material for a blue-light emitting organic electroluminescent device comprising the material of claim 26.
